

In Commemoration of Environment Day, WBM Educates and Plants Trees in SDN 02 Sungai Cuka

Sungai Cuka, 2025 — In commemoration of Environment Day, PT Wahana Baratama Mining (WBM) with its partner, PT Karunia Armada Indonesia (KAI), carried out tree planting and provided environmental education at SDN 02 Sungai Cuka, Tanah Bumbu, South Kalimantan, on Wednesday, 25 June 2025.

A total of 50 trees were planted collaboratively by students, teachers, the school committee, and teams from both WBM and KAI. The tree varieties planted were diverse, ranging from mango, weeping fig, blackboard tree, red lip tree, to Kasturi (a native Kalimantan species that is now rare). The event was attended by the Chief Mine Officer of WBM, Mr. Frans Hernugroho, and the Head of KAI, Mr. Doni.

This activity is part of the company's regular programs designed to introduce the importance of environmental conservation from an early age. It focuses on schools around the operational areas to help build environmental awareness among students.

Through this tree planting activity, WBM and KAI hope to create more green space at the school, while providing students with a facility to learn the significance of environmental conservation. This collaboration also serves as an example that environmental stewardship can begin with simple actions and bring together many different parties.
